The best kids table ever! Too bad it has been discontinued by IKEA. It is such a solid kid's table and adjusts in height for years and years of coloring, Play-Doh, Legos, and then even into the homework years. Ours is in impeccable shape, with only one scratch. I am including two vibrant red, LIFETIME chairs (valued at \$30 each), because they are such solid companions and the perfect height for the table. Thank you for checking out the listing!
